Making the market

NVIDIA pioneered accelerated computing to tackle challenges no one else can solve. We engineer technology for the da Vincis and Einsteins of our time. Our work in AI is transforming 100 trillion dollars worth of industries, from gaming to healthcare to transportation, and profoundly impacting society.

Transforming Product Design and Manufacturing

More Seamless Multi-App Workflows

Rhino, Fusion360, Omniverse Create

CHALLENGES

- ✗ Complex design workflows leading to delays in product launch
- ✗ Incompatible data formats from multiple engineering applications hamper creativity
- ✗ Lag in synchronizing data between design, engineering, manufacturing and marketing

OMNIVERSE VALUE

- ✓ Better communication, feedback, and decision-making, dramatically reducing production time from 12-18 weeks to 4 weeks
- ✓ Efficient and modern manufacturing workflow that aggregates full-fidelity 3D data across multiple apps without any data loss
- ✓ Interactive and vivid environment for design reviews; photorealistic models for marketing and customer engagements

THE RIGHT PRODUCT AT THE RIGHT PRICE... EVERY TIME

Fashion is a fast-moving business. Customers' needs and desires change quickly to keep up with the latest trends. Zalando uses consumer data and sophisticated algorithms, powered by NVIDIA GPUs in Amazon EC2 P3 instances, to improve product recommendations.

When shoppers place items in their carts, the AI responds with personalized suggestions for additional items — giving each customer a hyper-personalized shopping experience.

ANNOUNCING TENCENT IN PRODUCTION WITH NVIDIA MERLIN

Over 1 Billion Monthly Active Users

Recommender Training Time Reduced from 20 to 3 Hours

Rapid Iteration Improved Model Accuracy and CTR

SNAP IMPROVES CONTENT RANKING RECOMMENDATIONS WITH NVIDIA MERLIN

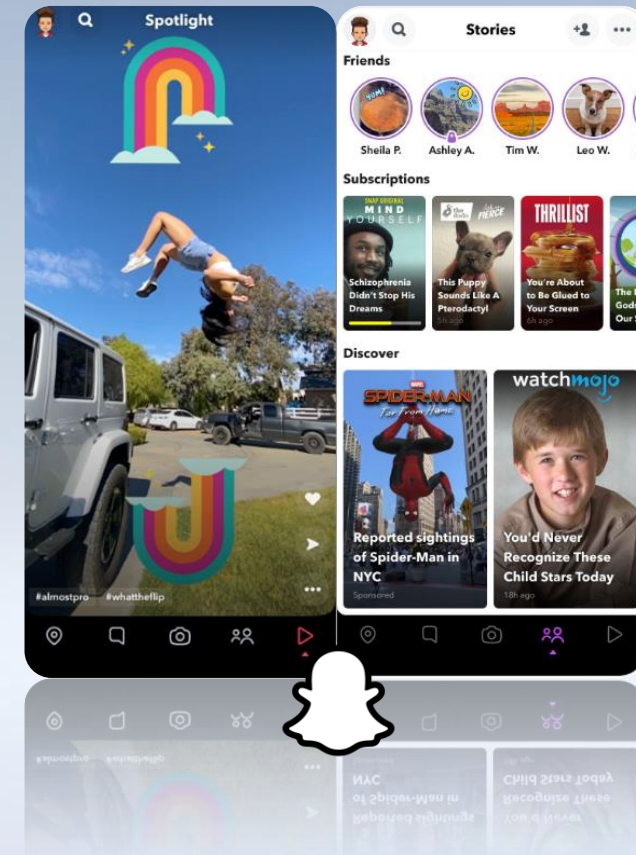

265M People | 5 Billion SNAPS | 30X Engage | 100s Content Ranking Models

Recommenders Curating Real Time Content Feeds, Training Models Daily, Seeking Hourly, and More Rapid Experimentation

Merlin Software Improved ML Inference Cost Efficiency by 50%

Decreased Serving Latency by Over 60%

Providing Compute Headroom to Experiment and Deploy Heavier, More Accurate ad and Content Ranking Models

SPOTIFY IMPROVES PLAYLIST RECOMMENDATIONS WITH NVIDIA MERLIN

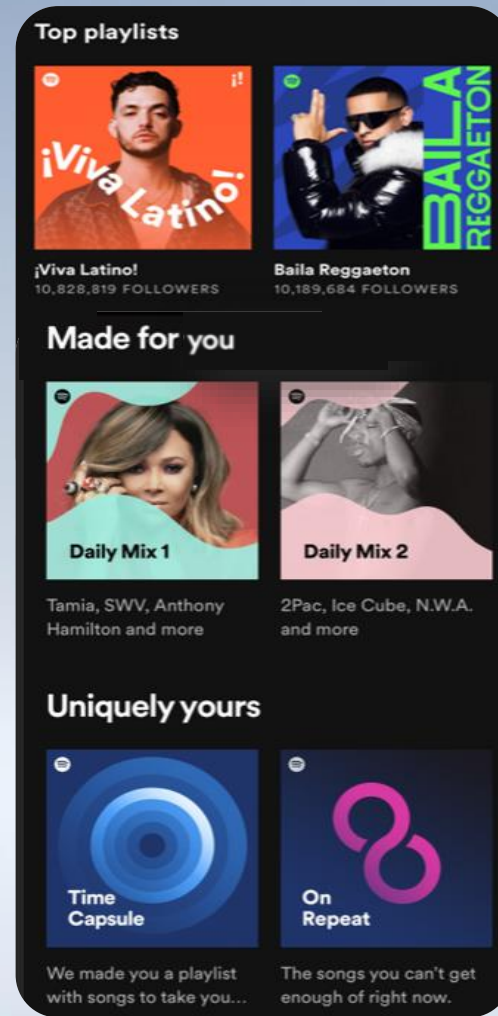

350M Listening Monthly | 70M Songs | 4B Playlists

Transform How Millions Access, Share, And Listen To Music

Keeping Recommenders Fresh With Daily Training, Targeting Hourly

Model Validation Time Reduced From 3.5 Hours To 10 Seconds

Faster Time To Production, Enables Better Recommenders

WALMART IMPROVES DYNAMIC PRICING FOR CUSTOMER SAVINGS WITH NVIDIA MERLIN

200M Customers Per Week | 500M Items Per Year | 4600 Stores | 2M Employees

Recommenders Connect Right Item, Location, Person At A Low Price

10X ETL Operations Speedup With Merlin NVTabular

Optimizing And Scaling Recommenders Provides Additional Savings To Customers

PINTEREST USES TRITON TO IDENTIFY TRENDS IN 300B PINS FOR BETTER SEARCH RESULTS

259M MAU worldwide

Provide a delightful customer experience through highly relevant search results and recommendations

State of the art computer vision models by Triton on V100 process 300B pins(images) every night to extract embedded features

High throughput batch inference - 3x higher throughput with Triton dynamic batching

THE RIGHT PRODUCT AT THE RIGHT PRICE... EVERY TIME

Fashion is a fast-moving business. Customers' needs and desires change quickly to keep up with the latest trends. Zalando uses consumer data and sophisticated algorithms, powered by NVIDIA GPUs in Amazon EC2 P3 instances, to improve product recommendations.

When shoppers place items in their carts, the AI responds with personalized suggestions for additional items — giving each customer a hyper-personalized shopping experience.

PERSONALIZED FASHION AT SCALE

- Over 150M active users and growing rapidly
- Users sent in Pinterest images of products they like – and stylists matched to existing inventory
- Impossible for humans to service this volume and complexity
- Powered by GPU-accelerated style recommendation algorithms, Stitch Fix is able to deliver personalized fashion at scale

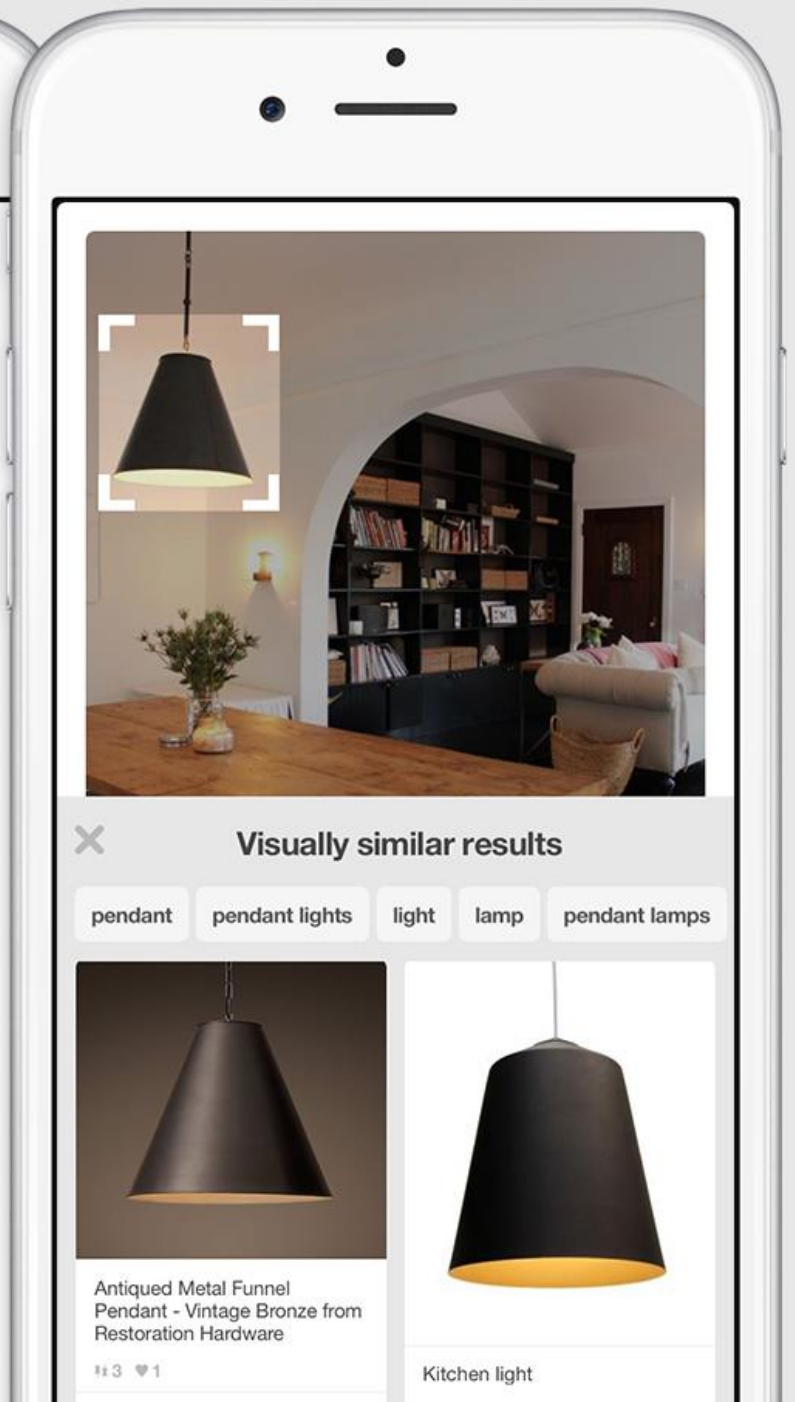

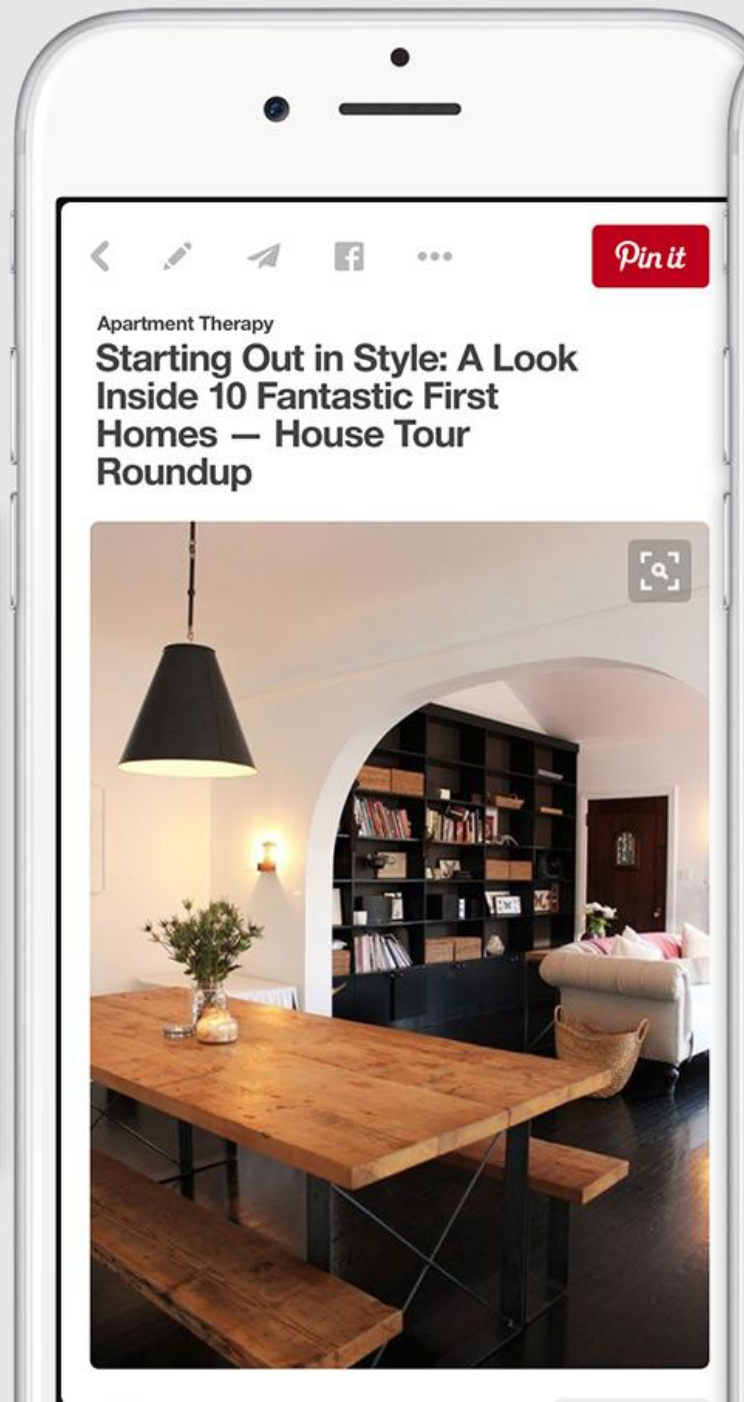

[Take the Stitch Fix algorithms tour](#)

IMPROVED SEARCH FOR A BETTER SHOPPING EXPERIENCE

"Pinterest uses state of the art computer vision technology to build a sophisticated understanding of over 175B pins. We rely on GPUs for training and evaluating our recognition models and for performing real-time inference."

—Andrew Zhai, Visual Search Tech Lead, Pinterest

Product Intelligence is the process of storing anonymous
behaviour on products instead of users

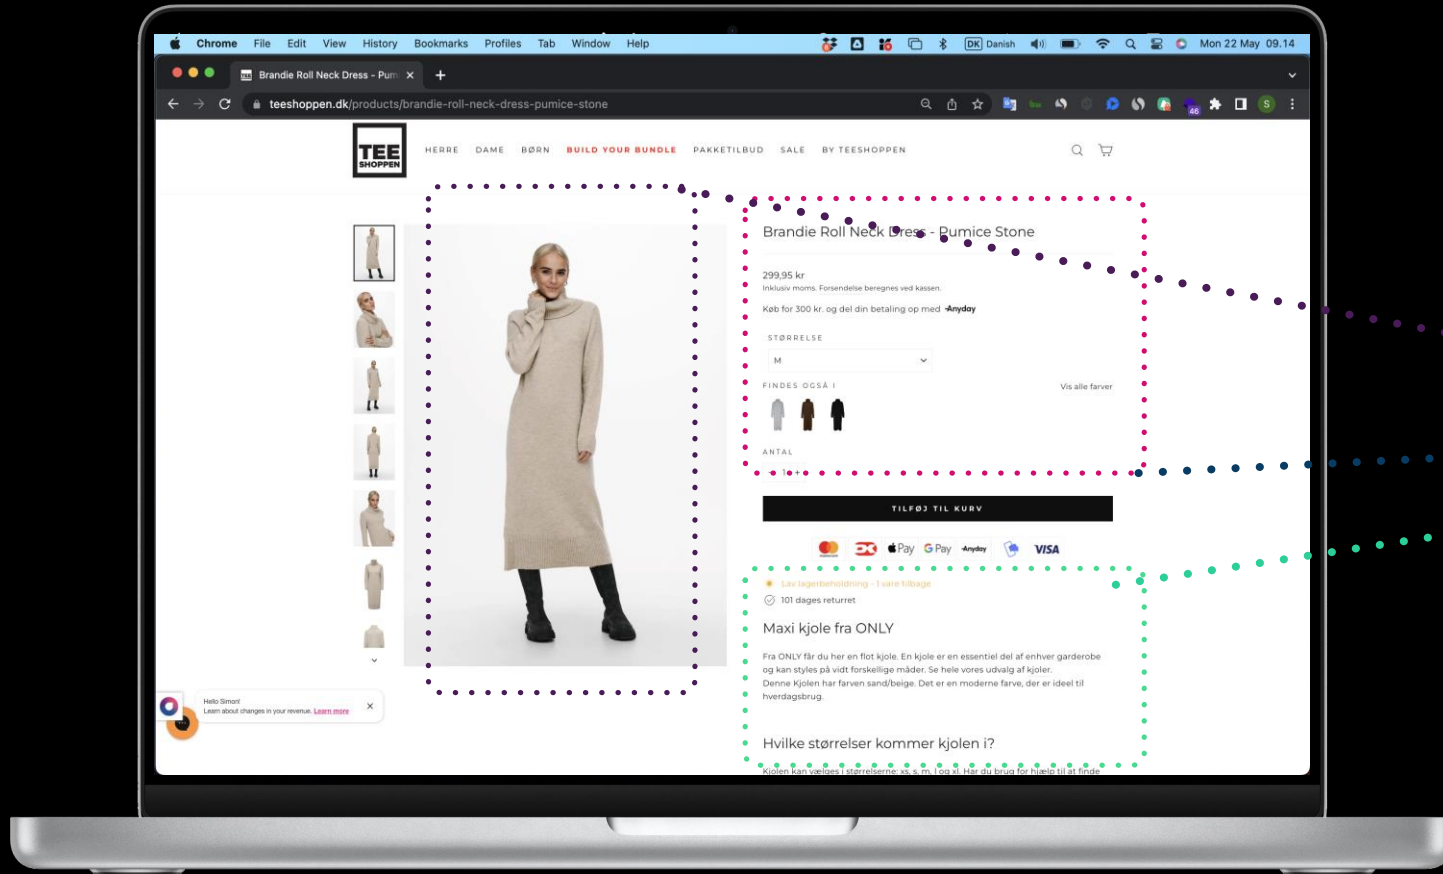

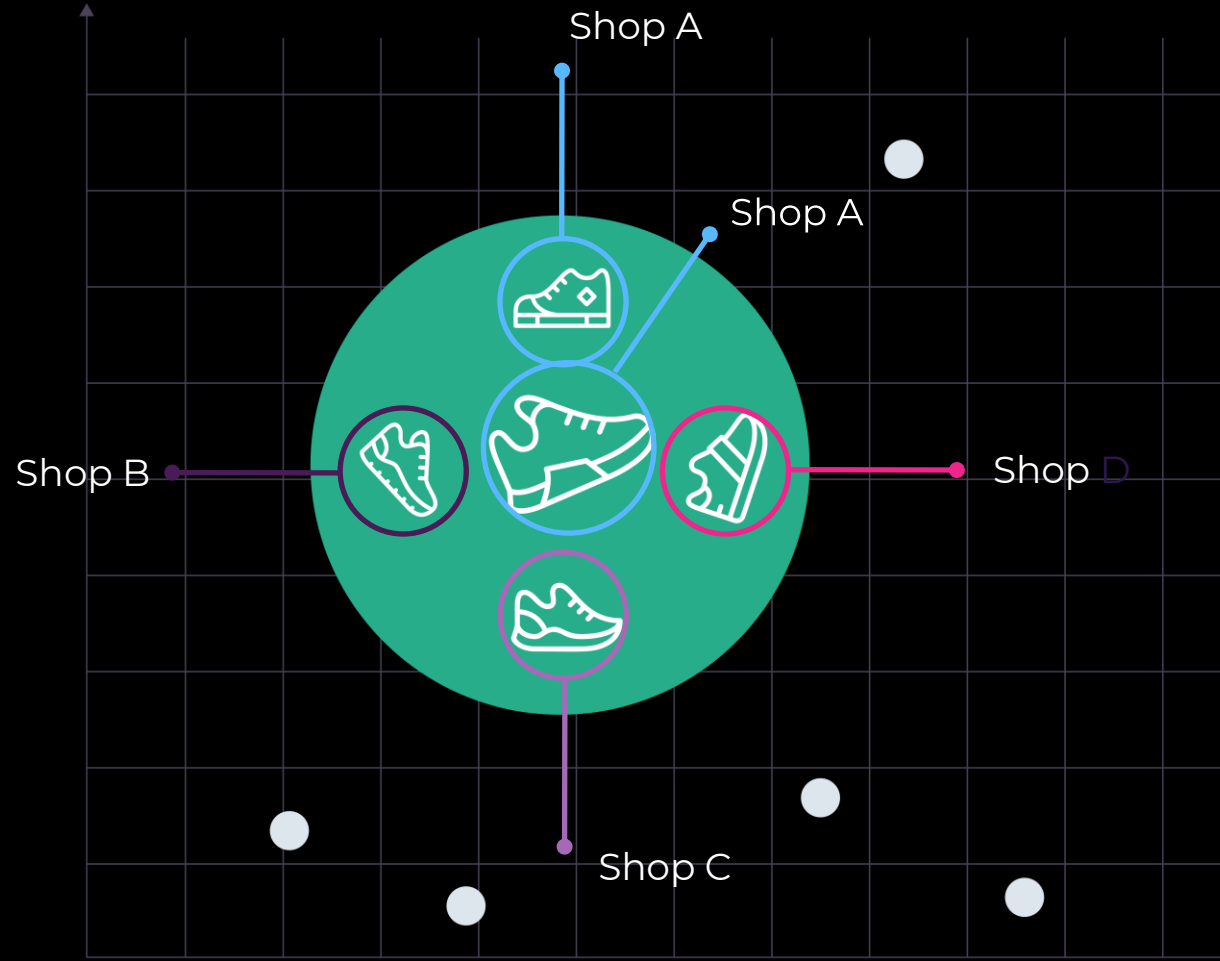

Protecting user privacy is crucial, given the significance of the Cookie Law, GDPR, and user sentiment.

Browsers make it harder to track users across sessions

Product Intelligence uses machine learning to analyze product data like text, images, price, etc., and plot it on a multi-dimensional graph.

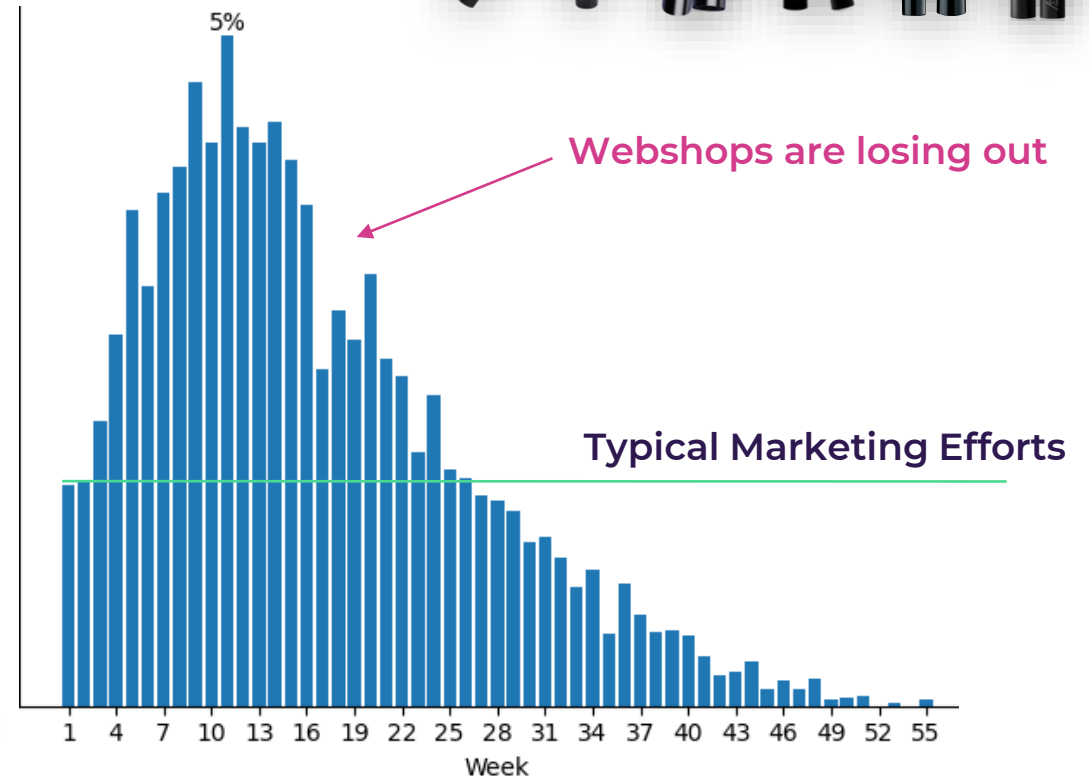

The process of grouping similar groups of products into one product, to reuse product behaviour

With clustering you can begin seeing trends across large product catalogs

Understand when to push recurring products by looking at a similar group of products (cluster)

Don't push customers to buy this type of mascara again after week 25

Understand the optimal product buying journey

Understand:
What order products are purchased, with what likelihood and when
