GREEN DIALOGUE

ROUNDTABLE ON ENERGY EFFICIENCY IN SOUTHEAST ASIA

Join the Green Dialogue organized by the Confederation of Danish Industry, the Danish Embassies in Indonesia and the Philippines, and State of Green to gather stakeholders from Denmark and the SEA region on energy efficiency. The purpose of the roundtable is to share the findings of the report highlighting the opportunities within energy efficiency in the Southeast Asian region.

The Southeast Asian Region is facing and massive economic growth. Forecasts suggest that this will, as in many other developing nations, result in an increase of electricity and energy consumption in society. According to the IEA, the region's energy consumption will rise to present 26% of the global energy consumption in 2040.

The Danish Embassies in Indonesia and The Philippines, together with partners in the region, have prepared a report mapping the potentials of energy efficiency in the Southeast Asian Region, focusing on Indonesia and the Philippines.

WHEN AND WHERE?

14th of April 2021 from 09.00 a.m. to 10.30 a.m. via on Microsoft Teams.

YOU WILL GET

- Insights into the rising demand for energy efficient solutions and products in the Southeast Asia region.
- Meet key stakeholders from the Southeast Asian region and Denmark
- Support in arranging B2B meetings with interested players during the digital roundtable

PRICE

It is free of cost to attend.
