

GREEN BUILD & ENERGY EFFICIENCY DELEGATION NEW YORK

25-27 JANUARY 2022

THE CONFEDERATION OF DANISH INDUSTRY is joining forces with Danish Cleantech Hub in New York, in order to organize a three-day business delegation focussing on the sectors of buildings and energy efficiency from the 25-27th of January 2022. With the vast potential for exporting green solutions to New York, this delegation strives to create opportunities for Danish companies offering expertise to the green transition of buildings and energy efficiency.

GREEN NEW YORK

New York is not only the most populous state in America with over 8 million inhabitants, but it is also seen as one of the most progressive American states when it comes to accelerating green growth. This is further highlighted by the state's ambitious goals to reduce its CO2 emissions by 100 percent by 2050, to lower its CO2 emissions from buildings with 35 percent by 2025, and also by its massive investments of \$104.1 billion into the green transition of New York.

INFRASTRUCTURE IN NEW YORK

Infrastructure is also on New York's green agenda. In fact, it is estimated that by 2050, 8,000-30,000 new buildings are to be built and up to 70,000 buildings are going to be replaced. It is also estimated that 14,500 building have already been selected for retrofitting. In this process, green solutions and innovative products are vital. With the high quality of Danish expertise within this field, the interest for Danish solutions and products to enhance the energy efficiency within New York buildings is in high demand.

WHEN AND WHERE?

The delegation will take place in New York City, USA from 25-27 January 2022.

PRICE

The participation fee is DKK 7,000

The price covers two participants per company excluding hotel and flights. The price is dependent on an already achieved 75% subsidy from the Danish Trade Council and a minimum of 8 participating companies. If the number of participating companies change, we reserve the right to offer participation at a different price.
