

Connectivity for the future

Copenhagen, 01.10.2025

Program

Connectivity, Resilience, and Innovation

The business forum will consist of a joint morning program followed by three sector programs in the afternoon. The program will end with a joint reception at the Danish Industry building in Copenhagen. During the day, there will be plenty of time for networking.

The morning conference will focus on connectivity, resilience and innovation. The afternoon will consist of three parallel thematic blocks, each with two workshops on: Green transition; sustainable building and living, and digitalization and automation.

Digitalization and Automation

Industrial Automation and AI – explores opportunities for digital transformation in industry, particularly through AI and automation, building on Denmark’s automation expertise and Germany’s Industry 4.0 initiatives.

Digital Solutions to improve Competitiveness – Discusses how digital solutions in the public sectors in Germany and Denmark can improve competitiveness and how industry can contribute to this development in both countries and at EU level
